104	606485829	7,39,70,27,055.45	31,92,27,71,040.11	23.17%
108	592636186	7,98,96,63,241.24	31,92,27,71,040.11	25.03%
51	592462378	8,58,21,25,619.59	31,92,27,71,040.11	26.88%
27	586745208	9,16,88,70,827.74	31,92,27,71,040.11	28.72%
99	548333930	9,71,72,04,758.17	31,92,27,71,040.11	30.44%
24	545663571	10,26,28,68,329.32	31,92,27,71,040.11	32.15%
146	537248370	10,80,01,16,699.82	31,92,27,71,040.11	33.83%

Q4. Is the business following the pareto principle (80% of the revenue getting generated from the 20% of the centers)?

Ans. No

Reason: 80% of total revenue are not by 20% of the Centers. Actually, 51 centers (60% center) contribute to the 80% the revenue. Therefore, violating 80-20 Principle.

☐ Biryani

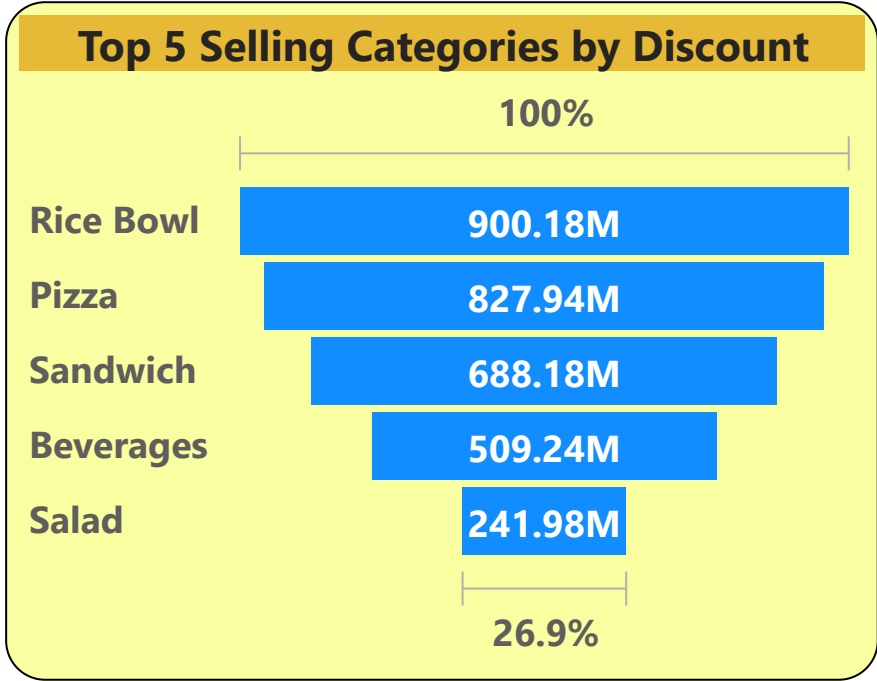

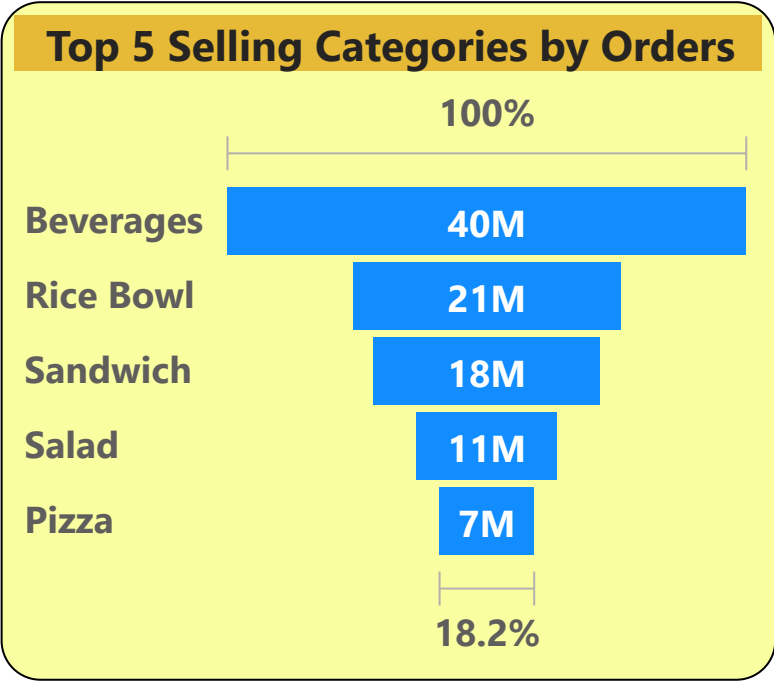

☐ Desert

Cuisine

☐ Continental

☐ Indian

☐ Italian

Q5. What are the top 5 selling categories?

Ans. From the above three funnel chart, it is clear that **Beverages** is largest in terms of orders and revenue and discount is also less compared to other categories. It shows good health about Beverages i.e. Less Discount, More Order & More Revenue. Rice Bowl is the most discounted and brings second highest orders & revenue. It shows good return of Discount which makes it second highest in terms orders and revenue. Likewise, Sandwich and Salad are doing fine. However, Pizza is the second most discounted category but returns lesser number of orders and revenue. This needs attention.

Order by Operation Area

4 11780398

Q6. Does the operational area of the store influence number of orders?

Ans. Yes. Operation Area influence number of orders. From the tree map, it is clear that more than 60% of orders are from the centers where area corresponds to more than 3.5 with few exceptions. Other centers with area more than 3.5 and not performing well might be due to recent opening of centers.

☐ Desert

Q8. What will be the next 5 weeks forecasted weekly quantity sold for each center, city, and meal category (you may use a simple trend-based forecasting method)?

Ans.

Week No. - Total Orders Forecast

- **146th Week** - 712133 (1044389-379876)
- **147th Week** - 720929 (1063492-378367)
- **148th Week** - 665012 (1017580-312444)
- **149th Week** - 697968 (1060265-335671)
- **150th Week** - 800136 (1171907-428364)

Moreover, we can use the slicer to get different insights about order quantity.

Based on the above forecasting, Procurement planning is to be done for different meal since meal deal with the perishable items. Moreover, based on forecast of orders for each center, staffing need to be done to make timely delivery of orders.
